

Kauê Christian

Junior Software Engineer

kauefirmo410@gmail.com linkedin.com/in/kaue-firmo github.com/KaueChristian kauechristian.github.io

Goiânia, GO — Brazil

Open to full-time (CLT), contractor (PJ) and international contracts · Remote for roles outside Goiânia · Hybrid in Goiânia

OBJECTIVE

The part I enjoy most about programming is being able to develop and implement ideas into systems, which proves to be quite challenging in many cases. I'm always seeking to learn and understand new technologies and languages, expanding my knowledge and skills with the goal of adapting to company and market standards.

EXPERIENCE

Junior Developer II

Jul 2026 — Present · 3 months

Tron Sistemas · Full-time · Goiânia and region · Hybrid

Development and evolution of system modules, working from the database to the interface and supporting the team's technical decisions.

Junior Developer

Feb 2026 — Jul 2026 · 6 months

Tron Sistemas · Temporary · Goiás, Brazil · Hybrid

Implementation of new features and bug fixing in applications already in production, focused on stability and code quality.

Intern

Mar 2025 — Feb 2026 · 1 year

Tron Sistemas · Internship · Goiânia, Goiás, Brazil

Legacy system maintenance and error handling, working on the stability and continuity of production applications.

IT Assistant

GoConsignado

Machine maintenance for the company and support with system features.

PERSONAL PROJECTS

Goopportunities

github.com/KaueChristian/Goopportunities

Full dashboard and REST API in Go (Gin + GORM + SQLite) with a React web interface to search, publish and track tech job listings in real time.

[Golang](#) · [React](#) · [TypeScript](#) · [SQLite](#) · [REST API](#)

URL Shortener

urlcraft-fv59.onrender.com

Link shortener with a Flask API and a Vue.js interface, including handling and validation of the URLs it receives.

[Flask](#) · [Vue.js](#) · [Python](#)

StudySync

github.com/KaueChristian/StudySync

Study planner for Windows and web: sessions per subject with real-time reminders, a focus timer (Pomodoro), supporting-content search across trusted sources and Markdown notes.

[Python](#) · [FastAPI](#) · [React](#) · [SQLite](#) · [WebSocket](#)

Inventory Manager

Desktop software for inventory control, with a Python and SQLite back end and a graphical interface built with Tkinter.

[Python](#) · [SQLite](#) · [Tkinter](#)

Social Media Bot

Automation of repetitive social media tasks using Selenium, including scheduled message sending.

[Python](#) · [Selenium](#) · [Automation](#)

SKILLS

Core Languages	Python, Delphi, JavaScript, TypeScript, Java, Golang
